HOUSE BILLS

HB1003: Rural Jump-start Zone Act Expansion

The Rural Jump-Start Program incentivizes businesses to create and maintain jobs in rural parts of Colorado by providing tax incentives both to the businesses themselves and to their employees. These businesses must be located in designated economically distressed areas of Colorado known as Rural Jump-Start Zones. This bill extends the program for five years and allows economic development organizations to form Rural Jump-Start Zone programs so that more counties in more parts of the state can participate.

HB1157: Loaned Water For Instream Flows To Improve Environment

This bill expands Colorado's instream flow program, which allows water-rights holders to temporarily loan their water to the Colorado Water Conservation Board's (CWCB) instream flow program during dry years without jeopardizing their water rights. This bill will improve the natural environment by providing water users a way to voluntarily divert less or no water during dry years, which will in turn positively impact local economies, wildlife, river health, and downstream agriculture.

HB1159: State Engineer Confirm Existing Use Instream Flow

Idea directly from Routt County! This bill authorizes state water officials to confirm historical usages, such as water used for livestock, and whether or not it's part of an official water right. This allows ranchers' use to stay first in line for water, ahead of the stream protections known as in-stream flow rights.

SB163: School Entry Immunization

This bill formalizes Colorado's requirements on immunizations, requiring parents and guardians seeking an immunization exemption for their child to fill out a standardized form developed by the Colorado Dept. of Public Health and Environment saying that they want to claim an immunization exemption for a religious or personal belief. SB20-163 addresses the issue of under-immunization in a bipartisan way, improving public health, reducing the risk of an outbreak, and keeping our children safe in schools.

SB088: Evidentiary Rules When Interference With Witness

Under the current opinion of the Supreme Court, if a party to a criminal case wrongfully makes a witness unavailable, evidence that that witness would have offered is inadmissible as it constitutes hearsay evidence. This bill allows that evidence to be admitted to the court and prohibits the party responsible for making the witness unavailable from objecting to the admission of that evidence to the court. This bill makes an exception to the hearsay rule when the defendant has caused the unavailability of the witness.

Bi-partisan sponsorship: Sen. Rhonda Fields & Reps. Dylan Roberts and Matt Soper

Status: SIGNED INTO LAW BY THE GOVERNOR.

SB048: Study Strengthening Water Anti-speculation Law

Current law specifies that an appropriation of water cannot be based on speculation. This bill requires the executive director of the department of natural resources to convene a work group to explore ways to strengthen current anti-speculation law and to report to the water resources review committee by August 15, 2021, regarding any recommended changes.

Bi-partisan sponsorship: Sens. Kerry Donovan and Don Coram & Reps. Dylan Roberts and Marc Catlin

Status: SIGNED INTO LAW BY THE GOVERNOR.

SB039: Update Accessibility Signage State-owned Facility

This bill updates accessibility signage in state-owned facilities to depict an accessible icon with a more dynamic character that leans forward in the wheelchair and shows a sense of movement. Existing signage and language on accessibility signs emphasize the disability itself, rather than the individual person. While this change may seem small, this updated image is intended to de-stigmatize the accessibility logo while taking a step towards protecting against discrimination on the basis of disability in Colorado. Change the sign, change the attitude!
